

Carpet Care for Offices

Maintenance cleaning, spot treatment and periodic deep cleaning for commercial carpets.

Protecting a significant investment

Commercial carpet is expensive to replace and highly visible to staff and visitors. A consistent care routine extends its life and keeps presentation standards high.

Key Considerations

01

Routine Vacuuming

The single biggest factor in carpet longevity is regular removal of grit before it wears down fibres.

- High-traffic areas vacuumed daily
- Lower-traffic areas covered on a weekly rotation
- Edge and corner detailing included, not just open floor

02

Spot & Stain Treatment

Fast response to spills prevents temporary marks becoming permanent stains.

- Spot treatment carried out as soon as possible after a spill
- Correct treatment method matched to the stain type
- Staff trained to flag spills for prompt attention

03

Entry Matting

Most carpet wear and soiling starts at the entry point.

- Walk-off mats sized appropriately for entry traffic
- Mats cleaned or replaced on a regular cycle
- Extended matting considered for high-traffic entries

04

Periodic Deep Cleaning

Even well-maintained carpet needs a deeper clean to remove embedded soil.

- Hot water extraction for a deep, thorough clean
- Low-moisture methods where faster drying is needed

- Scheduled around occupancy to minimise disruption

05

Scheduling & Budgeting

A planned cycle avoids carpet reaching a visibly worn state before action is taken.

- Deep clean frequency matched to traffic levels
- High-visibility areas (reception, meeting rooms) prioritised
- Cycle reviewed annually against actual wear

Not sure where to start?

Not sure where to start?

Master Clean provides hot water extraction, low-moisture cleaning and stain treatment for commercial carpeted areas, extending carpet life and improving hygiene.
